

# committed to the environment ...

... the manor house

At The Manor House we are committed to developing our people, services and profitability in order to fulfil our potential as a local employer and as a high quality conference centre and hotel for clients.

In doing this, it is inevitable that we will affect the environment around us. Although there is no way to avoid this completely, we can reduce the negative impact we have on the environment by adopting green policies and practices wherever possible.

To demonstrate our commitment to this goal, we have undertaken to:

- Achieve an award under the Green Tourism Business Scheme and improve our rating year on year.
- Communicate this policy and actively promote environmental awareness amongst our employees and customers.
- Adopt measures to reduce water and energy consumption and encourage their wise use.
- Use local suppliers where possible and take environmental factors into consideration when making purchasing decisions.
- Use local and Fairtrade produce when we can and avoid knowingly using genetically modified ingredients or products.
- Take all reasonably practicable measures to deal with our waste: by reducing it at source, re-using elsewhere or by recycling. Whatever is left, we'll dispose of safely.
- Have care for the local and wider environment promoting such things as the use of public transport, local visitor attractions and our natural heritage (we are benefactors of Godalming Museum).

Howard Canning,  
Centre Manager
